** Indicates inability to obtain approximate solution, and values will not match those reported by AHCCCS

All plans scored the same; unable to weight these categories

Finance

All plans show same values for most questions, and there is no variability on these items among plans; causing matrix to not be full rank. **No solution available using all question weights.** A reduced matrix that excudes these variables shows **relative** weighting of remaining variables, but will not match weights provided by AHCCCS: Binder did not have pages containing finance scoring for AmeriGroup or Pima

Network

Residuals are higher for Network than other areas. Weighted values are larger, and weightings are approximate. Possible rounding in AHCCCS document may be creating larger residuals.

IT

All plans are co-linear for question related to IT software vendor. Consequently, **no solution is available**. A reduced matrix that excudes the IT software vendor variable shows **one possible** weighting of remaining variables. Model will NOT match AHCCCS weights, and represents one possible solution for remaining variables.
